BioMarin Symposium - Invitation

Evolving Achondroplasia Clinical Practice: From Growth to Complications Management

29 OCT

12:20 - 13:20

**Join us for an insightful symposium focused
on the evolving landscape of achondroplasia care.**

Explore the shift from understanding the burden of achondroplasia to recognizing its multisystem impact, the evolving standard of care with Vosoritide, and the importance of comprehensive patient screening and assessment.

Through clinical insights and scientific evidence, we will discuss how emerging data can be translated into clinical practice to support a more comprehensive approach to achondroplasia management.
